Summary

Senior Data Scientist at IBM Consulting specializing in Generative AI and Agentic systems. Expert in architecting end-to-end ML solutions, from RAG-based applications to large-scale predictive models. Proven track record in translating complex business requirements into high-impact data products for global enterprises.

Experience

IBM Consulting

Brussels, Belgium

Senior Data Scientist

Jan 2025 – Present

- Leading the strategic implementation of Generative AI and Agentic solutions, focusing on LLM orchestration, RAG architectures, and custom AI agents for enterprise clients.
- Directing predictive maintenance for a multi-million device portfolio; utilizing ensemble models (XGBoost) to identify failure drivers and automate intervention prioritization.
- Mentoring junior data scientists and aligning technical analytics roadmaps with strategic business priorities.
- Coordinating high-level incident support, translating technical analytics into actionable business remediation plans.

Data Scientist

Apr 2022 – Dec 2024

- Developed geospatial analytics pipelines using cell tower data to optimize network coverage and identify LoRaWAN congestion points.
- Engineered high-performance KPI dashboards using SQL and TimescaleDB; optimized query performance via materialized views, reducing reporting latency from hours to minutes.
- Partnered with stakeholders to define operational KPIs and drive data-informed decision-making for business performance.

Junior DevOps Engineer & Automation Intern

Feb 2021 – Apr 2022

- Implemented internal automations and evaluated RPA vendors to streamline workflows; produced documentation and training materials to support enterprise-wide adoption.

Selected Projects

Apollo Fitness (AI Agent Ecosystem) | *Python, LangChain, PyTorch, OpenAI API*

2024 – Present

- Developing a sophisticated fitness ecosystem (WIP) using AI agents to generate personalized workout and nutrition plans.
- Implemented Agentic workflows and RAG to process user preferences and provide real-time, context-aware suggestions.

Office of the Future (ML6 Collaboration) | *OpenCV, Google Cloud, Flask*

2021

- Developed a computer vision system to monitor and optimize office space utilization using real-time occupancy analytics.

Skills

AI & Machine Learning

Generative AI, LLMs, Agentic Workflows, RAG, PyTorch, TensorFlow, LangChain, Scikit-learn, XGBoost, Computer Vision

Data & Cloud

Python (Pandas, NumPy), SQL, TimescaleDB, Grafana, Google Cloud Platform (GCP), IBM Cloud, Git, Flask

Languages

Hindi (Native), English (Native), Dutch (Native), French (Elementary)

Certifications

Energy, Environment and Utilities Insights and Solutions (Bronze) (IBM, 2025); IBM Generative & Agentic AI Foundation (IBM, 2024); IBM AI Associate Data Scientist (IBM, 2022); Trustworthy AI and AI Ethics (IBM, 2022); Enterprise Design Thinking Practitioner (IBM, 2024)

Education

Howest

2018 – 2021

Bachelor's degree, New Media & Communication Technology (NMCT)
